ROBERTO NICHOLAS MEDINA SEBASTIAN

BS Information Technology • 4th Year | Ateneo De Davao University
nikkobastian910@gmail.com | Buhangin, Davao City, Philippines
Portfolio: https://roberto-sebastian.vercel.app/

OBJECTIVE

4th-year BS Information Technology student seeking an OJT placement to gain real-world IT experience. Brings hands-on skills in Linux, Docker, CI/CD, and networking fundamentals, and is eager to contribute to any IT team while learning from professionals in the field

EDUCATION

Ateneo de Davao University Davao City, Philippines

Bachelor of Science in Information Technology | Expected Graduation: 2027

- Currently in 4th year

ACADEMIC & PERSONAL PROJECTS

Chelsy's Burger POS System

Technologies: JavaScript, React, Vite, Tailwind CSS, Zustand, Recharts, Electron, SQLite (better-sqlite3), electron-builder | GitHub: https://github.com/sheleek1n/Sia2-Chelsys-burger

- Developed an offline desktop POS and back-office system for a local fast-food restaurant, covering ordering, inventory, and supplier purchasing, to replace paper logs and spreadsheets.
- Implemented role-based access for admins and cashiers, cash and GCash payments, and automatic stock restoration when an order is voided.
- Designed first-in, first-out (FIFO) batch inventory tracking with low-stock alerts and estimates of how many days each ingredient will last based on 7-day usage.
- Packaged as a Windows installer, with database backup and restore, and prepared for delivery to the client.

Gastok - A Multilingual AI Expense Tracker with Voice and Text Input for Filipino College Students

Technologies: Flutter, Dart, OpenAI Whisper, GPT-4o-mini, Google Sheets API | Github: https://github.com/sheleek1n/Gastok-Expense-Tracker-App

- Developed a mobile expense tracker as a capstone project that lets students log expenses by speaking or typing in English, Tagalog, or Bisaya. English and Tagalog are the most accurate; Bisaya works well and is still being improved.
- Integrated OpenAI Whisper for speech-to-text and GPT-4o-mini to pull out amounts and descriptions, and sort each expense into one of 8 categories.
- Designed an editable review step so users can correct AI-extracted entries before they sync to Google Sheets.

Basic Subnet Calculator Website

Technologies: JavaScript, ESLint, Vite, GitHub Actions, GitHub Pages | Github: https://github.com/BurrTow/subnetct | Link to deployed site: https://burrtow.github.io/subnetct/

- Built a CI/CD pipeline in GitHub Actions that lints, unit-tests, and builds on every push and pull request, with deployment to GitHub Pages restricted to the main branch.
- Developed a web-based IPv4 and IPv6 subnet calculator that runs entirely in the browser, computing network and broadcast addresses, subnet and wildcard masks, and usable host ranges.

TECHNICAL SKILLS

Operating Systems: Linux (Linux Mint, Ubuntu, CachyOS/Arch-based with Hyprland), Windows 11
DevOps & Cloud: Bash, Git/GitHub, Docker, Docker Compose, GitHub Actions (CI/CD), Supabase, Render
Networking: Cisco Packet Tracer, TCP/IP, subnetting, VLANs, basic router and switch configuration
Security: Log analysis, Windows system internals (Process Explorer, Event Viewer), vulnerability research
Development: JavaScript, React, Node.js, Flutter/Dart, SQLite
AI & Automation: Prompt engineering, AI-assisted development (Claude Code), creating custom Claude skills for workflow automation, OpenAI API integration (Whisper, GPT-4o-mini)

ORGANIZATIONS & EXTRACURRICULARS

Ateneo Japanese and Kendo Community **2022 - 2023**
Member

Samahan Systems Development **2026 -** present
Development Operations Engineer

- Build CI/CD pipelines as part of a three-member DevOps team to run automated tests on code changes before deployment.
- Perform final verification checks on releases to catch issues the QA team did not, before the site goes live.
- Deploy the site together with the DevOps team, releasing builds that have passed the automated and final checks.

CERTIFICATIONS & AWARDS

Cisco Networking Academy Course Completions
Cisco Networking Academy

- Completed Cisco NetAcad introduction to Networks (CCNA course), covering core networking fundamentals (Jan 2026)
- Completed Introduction to Cybersecurity, covering the threat landscape and core defensive practices (Jan 2026)
- Completed Networking Devices and Basic Configuration, covering network device setup and configuration (Feb 2026)

Lean Six Sigma White Belt & Yellow Belt Certification

Prof. Dr. Marcelo Machado Fernandes, Lean Six Sigma Master Black Belt | January 2026

- Yellow Belt: Completed 20-hour training and passed the final assessment on the Lean Six Sigma methodology (Credential No. 111736307).
- White Belt: Completed 4-hour training on Lean Six Sigma fundamentals and passed the final assessment (Credential No. 111735458).
